[How To Build A DigiByte DGB Miner 2018](#)

```
C:\Windows\system32\cmd.exe
Compiled with Visual C++ 18 using Nvidia CUDA Toolkit 7.5
Based on pooler cpuminer 2.3.2 and the tpruvot@github fork
CUDA support by Christian Buchner, Christian H. and DJM34
Includes optimizations implemented by sp, klaust, tpruvot, tsiv and pallas.
[2016-01-03 19:28:47] Starting Stratum on stratum+tcp://quark.eu.nicehash.com:3345
[2016-01-03 19:28:47] NVAPI GPU monitoring enabled.
[2016-01-03 19:28:47] 2 miner threads started, using 'quark' algorithm.
[2016-01-03 19:28:47] Stratum difficulty set to 0.02

So I tried many pools, digihash, blockchain , supernova, either did not work or I was getting 100% invalid hashrate.. Tried sgminer and cgminer but I messages like stratum network restarting, difficulty lvl dropping infinitely and nothing is moving.

Hi big DigiByte family! Well I have been surfing the web for two days finding any kind of tutorial for dummies on how to mine DGB! Well I learned many things so far but didn't succeed with my original purpose, mine successfully.. DigiByte Mining Introduction The DigiByte project or begin building your own app on top of the DGB blockchain.. I have a R9 290 I think it was, anyway an AMD, so I can't do the CC miner because I have no CUDA cores.. DigiByte Foundation 2013 - 2018 How to mine Digibyte (DGB) using CCMiner for Nvidia video cards,ccminer digibyte, how to mine digibyte cpu, how to mine digibyte with nvidia, digibyte mining rig.
